What do you think of when you hear the word Visibility? According to the APICS dictionary, "Visibility is the ability to view important information throughout a facility or supply chain no matter where in the facility or supply chain the information is located." Visibility is essential for using information to replace inventory. Today's enterprises have multi-tiered networks of suppliers, trading partners, and customers, all of them playing a pivotal role in how that business brings their products to market. Companies now need inter-enterprise processes and visibility, and they need access to information that is not necessarily within their company. During this presentation, St. Claire will discuss Supply Chain Visibility and the processes and tools manufacturers and retailers are using to more efficiently serve their customers

About the presenter:

Mr. St. Claire Gerald

St. Claire Gerald is the founder and principal of Harambee Logistics Solutions, a management consulting firm specializing in operations and supply chain management. With over 20 years of experience working with fast-paced, rapidly expanding companies in the Specialty Retail, Ecommerce and Consumer Products industries, St. Claire is a frequent speaker and instructor in a number of professional venues. Prior to founding Harambee Logistics Solutions, Mr. Gerald served as Director, Supply Chain Management for Foot Locker Inc., the world's leading specialty retailer of athletic footwear and apparel with over \$6B in sales. In this capacity, he held a leadership role in developing strategies, processes and systems for improving the flow of merchandise across all areas of the global and domestic supply chains. Mr. Gerald graduated from the College of Wooster with a degree in Business and Economics. He is an adjunct professor for The Peter J. Tobin College of Business at St. Johns University and is also recognized as a Certified Supply Chain Professional and Master Instructor with APICS – The Association for Operations Management.
